ATHLETICS

Coach's Message

DONALD WYATT

Competing in athletics is a privilege that only a selected few ever attain. One should therefore feel proud to be a part of any type of athletic program. All athletic programs are designed to accomplish many different goals, no one being more important than the other. Athletics should help you to develop socially, emotionally, physically and mentally. You develop socially by meeting and competing against many different young adults of your own age. You obtain your emotional development by learning to cope with the many different situations that occur during a season. Athletics help you to develop mentally by keeping your body and your mind in good working condition. Being physically healthy is a prerequisite to proper mental development. Last but not least of the goals of athletics is that they are also designed for fun, health, and entertainment. I sincerely hope you have accomplished some of these things from taking part in athletics. If you have, athletics has been good for you and you have, been good for athletics.
